Dear Mr. Eburlas,

I am writing this letter, on behalf of my colleagues from FEU Diliman, with the intent of submitting a proposal regarding an online job hiring and recruitment selection system. This proposed system is a requirement in our Application Project 2 (APPROJ2) under the supervision of Dr. Irish C Juanatas.

The objective of the proposed system is to create and design an Online Job Hiring and Recruitment Selection System using PHP, MySQL, JavaScript, API, HTML and CSS to function as efficient and responsible for managing the internal and external recruitment processes of EmpowerU.

The system will be a dynamic website where applicants can view companies' events, internal job advertisements, and submit a resume. Other features will include a module that allows the employer to schedule an interview for qualified applicants and another module that informs applicants about the status of their application.

I am looking forward to discussing this proposal in more detail. Thank you for your time and consideration.

Sincerely,
Diego Saylon
